

5.7. RF EXPOSURE REQUIREMENTS [§§ 15.247(i), & 2.1093]

Pursuant to KDB 447498 D01 Mobile Portable RF Exposure V04, Section (2)(a)(i) a device may be used in portable exposure conditions with no restrictions on host platforms when either the source-based time-averaged output power is $\leq 60/f(\text{GHz})$ mW.

Output Power Limit for Portable Exposure Conditions = $60/f(\text{GHz})$ mW = $60/2.48$ mW = 24 mW

Maximum EUT Output Power Level = 9.95 mW EIRP

Conclusion: Complies with portable RF exposure conditions.
